Item #	Rule (16.03.22)	Description
1	.320.01. Use of NSA.	Residents' Negotiated Service Agreements (NSAs) did not clearly reflect the residents' needs nor describe the services to be provided. For example: Residents #2, #3 and #5 had pressure injuries which required nursing oversight and their NSAs did not clearly describe the care unlicensed personnel were to perform such as how to reposition each resident, what signs and symptoms of infection to monitor for nor how to care for the wounds while assisting with Activities of Daily Living (ADLs). The administrator stated the NSAs were not specific and needed more instruction regarding wound care.
2	.645.02. Delegation.	The facility admitted residents with high level pressure injuries such as stage 3, 4 and unstageable, and the facility nurse did not delegate unlicensed caregivers on how to care for these types of wounds. The facility administrator confirmed the nurse did not perform the delegations.
