Item #	Rule (16.03.22)	Description
1	.330.04. Behavior Documentation.	All resident care records were not completed by the person providing the care. For example, the care staff did not document Resident #1's behaviors as they occurred. The staff stated they notified the administrator of any behaviors and did not document them. The administrator stated the staff let her know when the resident had behaviors and she documented in the observation notes.
2	.330.06.a. Additional Resident Records.	The facility did not document evaluations of behaviors, including history, intensity, duration, frequency, triggers, and environmental factors when Resident #1 exhibited behaviors of yelling and screaming in common areas or resisting care, Resident #2 exhibited yelling at staff, and Resident #3 exhibited suicidal ideation and yelling and cursing at staff. The administrator stated she will continue to be more thorough with evaluation of behaviors.
