Survey Team Leader	Survey Type		Response Due
McClenathan, Teresa	Health Care Licensure and Follow-Up		09/06/2026

Item #	Rule (16.03.22)	Description
1	.330.04.b. Behavior Documentation.	The facility did not develop interventions for residents who exhibited maladaptive behaviors. For example, Resident #4's 2/28/26 and 5/29/26, 90-day nursing assessments documented the resident experienced fluctuating mood, anxiety, agitation, restlessness, occasional yelling, wandering, and occasional resident to resident conflicts. The assessments documented interventions such as, staff should allow the resident to wander with supervision, redirect them to another activity, and provide one-to-one reassurance to reduce agitation. The assessments documented Resident #4 had PRN lorazepam available when non-pharmacological interventions were not successful. Resident #4 did not have a BMP for staff to reference nor follow. The facility nurse confirmed the previous nurse nor she had implemented a BMP for Resident #4.
2	.310.04.a. Behavior Modifying Medication.	The facility did not attempt non-drug interventions prior to requesting medications for Resident #4. Psychotropic or behavior modifying medications were used as a first resort to address behaviors, which included lorazepam prior to the development of a behavior management plan (BMP). Resident #4's May through July 2026 medication administration record

		documented the resident received as-needed (PRN) lorazepam on four separate occasions for agitation. The facility nurse confirmed staff administered the medications prior to implementing a BMP.
