Survey Team Leader	Survey Type		Response Due
Ramirez, Mina	Health Care Licensure and Follow-Up		10/11/2026

Item #	Rule (16.03.22)	Description
1	39-3322.1 QUALIFICATIONS AND REQUIREMENTS FOR FACILITY STAFF	The facility did not arrange for sufficiently trained staff to fully meet the needs of its residents. For example, from 9/8/26 to 9/10/26, several residents, family members, and staff stated not all the staff, particularly on evening and night shift, had been trained to adequately transfer residents to and from wheelchairs nor trained on Resident #6's Sara Steady sit-to-stand mechanical lift. Resident #6's incident report, dated 2/2/26, documented they fell in the bathroom with a staff member present and the corrective action to prevent recurrence was to use two-people to assist with transfers. Resident #6's incident report, dated 3/20/26, documented only one staff member had assisted them when the resident fell again in the bathroom. Resident #6's incident report, dated 6/3/26, documented they fell a third time in the bathroom when two staff assisted the resident but had not locked the brakes on the wheelchair. Resident #6's care note, dated 8/31/26, documented the resident had been in bed when two staff attempted to transfer them and the resident began to slide off the bed. An all-staff Sara Steady lift training, dated 7/30/26, documented some of the staff on the night shift had not attended the training, and per the facility's as-worked

		schedule would have transferred Resident #6 as part of their assignments. A facility nurse stated the night shift staff in question would have transferred Resident #6 and stated she thought all the staff had been trained on the Sara Steady lift. The administrator stated Resident #6's Sara Steady lift was put into place several weeks ago and stated staff on the evening and night shift needed more training with transfers, including the Sara Steady lift.
2	39-3309.01 NEGOTIATED SERVICE AGREEMENT	Residents' Negotiated Service Agreements (NSAs) did not clearly reflect the residents' needs nor describe the services to be provided. For example, Resident #4's NSA did not document they wore a helmet for head protection when they fell. Resident #6's NSA did not document they used a Sara Steady mechanical lift with two staff members for transfers. The facility nurses stated the NSAs needed to be updated.
3	.310.01.f. Medication Distribution.	Residents did not receive their medications as ordered. For example, Resident #10 was ordered to receive 22 units of Lantus at bedtime and held for blood glucose under 120, but measurements were not taken prior to the administration at bedtime. The facility nurse stated the order was implemented without parameters, which resulted in the resident receiving their daily dose without blood glucose measurements to prevent improper administration. The facility also did not ensure all residents' as-needed (PRN) medications were available to them. Resident #2 did not have their loperamide and morphine available. Resident #7 did not have their loperamide, Nasonex nasal spray, and their polyethylene glycol available to them in the medication cart. The facility nurses stated they were unaware the PRN medications were not available.
